General Tasks

- **Google Map** adjustment on English version: Remove the white squares above and under the map

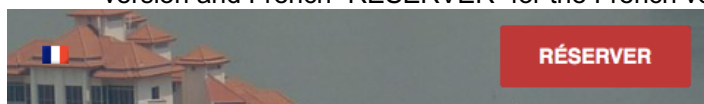

- **Safari** issues: (Only on Safari)
 - The first issue is about the booking page (<https://www.primehrental.com/en/reserver/>), when the client selects the “Baby cot (€ 20)” option, the € 20 does not add up to the total amount, and it should.
 - Issues with the accents on the title of the scrolling picture on the homepage
 - The second issue is about the footer : There is white line between the footer and the copyright part, which is wider than on other research engines

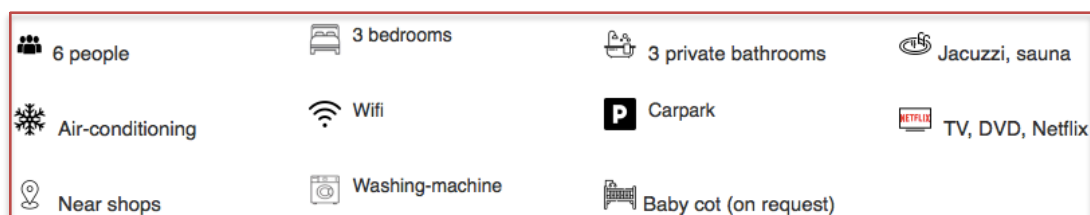

Home page

- The button “RÉSERVER” in the header should be in English: “BOOK YOUR STAY” for the English version and French “RÉSERVER” for the French version.

- The list of icons has to be perfectly aligned (like in the French version)

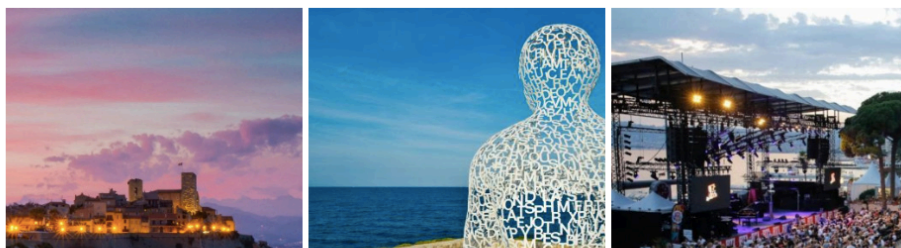

- When we click on the button in the middle of the page “BOOK YOUR STAY” it does not redirect to the English (<https://www.primehrental.com/en/reserver/>) page
- The 2 pages in Copyright part down the footer have to be in English when we are in English version:
 - Mentions légales: Legal Notices
 - Politique de confidentialité: Privacy policy

Emplacement Page

- In the page “Emplacement” French version, the second group of 3 pictures is cropped (smaller) on the height and should not be (→ check English version to compare):
